cars in camera...
...your complete
service provider

Established for over 35 years with our roots deeply embedded in vehicle movements and the film and promotional industries, Cars In Camera provide a wide variety of services, some of which are detailed below:

Car Transporting

We have a fleet of enclosed car transporters to provide security for high value, prestigious and vintage cars being transported anywhere in the world. Our vehicle sizes range from single car carriers through to six car carriers. Within the fleet, there a number of temperature controlled vehicles that are used for the movement of clay models and prototypes. All of the vehicles are fitted with winches to allow the movement of non running cars or prototypes, some are fitted with an independent electric generator for charging electric vehicles and providing lighting support. Some vehicles have tail lifts to ensure that cars with very low ground clearance can be loaded without the risk of damage.

All of our drivers are uniformed and have extensive experience of the industry sectors that we operate in.

Advertising and Film Shoots

Not only can we provide and deliver the cars to your locations, we also provide technicians to maintain their appearance and precision drivers to move the cars around during film shoots and photo calls. Recent advertising appearances for our staff include Hyundai and Renault. We are able to provide Peelcote services that allow cars to be sprayed with a different colour or design and then be returned to their original colour without the need to be resprayed.

Promotional Activities

We provide a range of services that cover any form of show preparation including removing all fluids and providing installations for showing off cars at their best, on site professional valetting and delivering to locations that aren't designed for cars. Our staff can remain with the vehicle during any show to ensure that they are maintained in a pristine condition.
